Introductory technical note	11
1. Morbidity and mortality	13
1.1. HIV and AIDS: Morbidity in Catalonia	15
1.1.1. Epidemiology of new HIV diagnoses.....	15
1.1.1.1. Extent and distribution.....	15
1.1.1.2. New HIV diagnosis characteristics in Catalonia.....	16
1.1.2. Epidemiology of AIDS.....	17
1.1.2.1. Extent and distribution of AIDS.....	17
1.1.2.2. Characteristics of the AIDS cases.....	18
1.1.2.3. AIDS in children.....	20
1.1.2.4. HIV/AIDS Mortality.....	20
1.1.2.5. HIV/AIDS infection in Barcelona.....	23
1.2. Morbidity rates of sexually transmitted infections in Catalonia	25
1.2.1. Epidemiology of sexually transmitted infections.....	25
1.2.2. The epidemiology of STIs in Catalonia.....	26
1.2.2.1. Extent and distribution of STIs.....	28
1.2.2.2. The characteristics of STI of individualised mandatory declaration.....	31
1.2.2.3. The characteristics of STIs reported to the Microbiological Notification System of Catalonia.....	33
1.2.2.4. The characteristics of the STI declared to the Register of STIs (RITS) in Catalonia.....	34
2. Monitoring the prevalence of HIV and STIs	51
2.1. Estimate of the overall prevalence of HIV infection in Catalonia.....	53
2.2. Prevalence of HIV in sentinel groups.....	54
2.3. Transverse Study of the Prevalence of STIs.....	57
2.3.1. Young Offenders in penitentiary centres (CT/NG-Prisons).....	57
2.3.2. Injecting Drug Users (IDUs).....	57
2.3.3. Female Sex Workers (FSW).....	58
3. Bio-behavioural monitoring	61
3.1. The monitoring of the prevalence of HIV infection and the sexual behaviours associated with its transmission in men who have sex with men	63
3.1.1. The prevalence of risk behaviours associated with HIV/STI infection in men who have sex with men recruited on the Internet.....	63
3.1.2. Monitoring the prevalence of HIV infection and the associated behaviours with its transmission in men who have sex with men.....	64
3.2. The monitoring of the prevalence of HIV/HCV/STIs and the behaviours associated with their transmission in injecting drug users (IDUs)	68
3.3. The monitoring of the prevalence of HIV infection and other STI infections and the behaviours associated with their transmission in female sex workers (FSW)	70
4. Monitoring HIV diagnosis	77
4.1. Monitoring through laboratory declarations.....	79
4.2. Monitoring through anonymous HIV detection centres.....	80
4.3. The extent of the HIV diagnostic test in special interest groups.....	82
4.4. Estimation of the delay in the diagnosis of HIV infection in Catalonia.....	84

4.4.1. Aids case register.....	84
4.4.2. Information system of new HIV infection diagnoses.....	85
4.4.3. Evidence of late diagnosis in the PISCIS cohort study.....	85
5. Observational studies.....	89
5.1. Non-occupational post exposure prophylaxis.....	91
5.2. Project for the computerisation of clinical epidemiological monitoring of HIV infection and AIDS (PISCIS Cohort).....	93
5.2.1. Progression of HIV Infection.....	94
5.2.2. Treatment for HIV Infection.....	94
5.3. Clinical epidemiological study of mothers and children exposed to HIV and/or antiretroviral drugs (NENEXP Project).....	96
5.4. Recent HIV Infections: AERIVIH (2006-2007).....	97
5.5. Monitoring the resistances transmitted to antiretrovirals in patients recently infected with HIV (2003 - 2005).....	99
5.6. Project: "Synergies between HIV infection and the Human Papillomavirus: Cervical cancer and its prevention in HIV infected women".....	101
5.7. Cohort of HIV negative men who have sex with men (MSM) for the study of early HIV and STI diagnosis and their determining factors.....	106

6. Indicators from Integrated Aids/HIV/STIs Surveillance System of Catalonia (SIVES) and other sexual and reproductive health (SRH) indicators.....	113
7. Annex.....	123
I. Relevant related publications list, from 2008.....	125
II. Abbreviations list.....	130
III. Tables list.....	132
IV. Figures list.....	134
V. Images list.....	136
VI. Contributors from the diverse information systems.....	137
